

**BIOLOGY****BIODIVERSITY AND ITS CONSERVATION**

- Number of species of ants may be accounted to be  
(1) 2,000 (2) 20,000  
(3) 3,00,000 (4) 2,00,000
- A more conservative and scientifically sound estimate of global species diversity was made by  
(1) Ernst Mayr  
(2) Charles Darwin  
(3) Robert May  
(4) Ernst Haeckel
- The global species diversity is more scientifically estimated at about  
(1) 20 to 50 million  
(2) 2 million  
(3) 10 million  
(4) 7 million
- More than \_\_\_\_ per cent of all the species recorded till present date are \_\_\_\_.  
(1) 70%, animals  
(2) 30%, plants  
(3) 90% animals  
(4) 80%, monerans
- What per cent of all the species recorded till present date are plants?  
(1) More than 22%  
(2) Less than 20%  
(3) More than 50%  
(4) Less than 10%
- Which group among animals are the most species rich?  
(1) Crustaceans  
(2) Insects  
(3) Angiosperms  
(4) Bacteria
- Generally, out of every 10 animals on this planet, \_\_\_\_ are insects.  
(1) 5 (2) 7  
(3) 9 (4) 10
- The fungi species in the world is more than combined total of the species of  
(1) Bacteria, viruses and algae  
(2) Bacteria and plants  
(3) Fishes, amphibians, reptiles and mammals  
(4) Fishes, amphibians, insects and mammals
- About which taxonomic group's diversity are biologists not sure of  
(1) Insects (2) Fungi  
(3) Mammals (4) Bacteria
- India's share in among world's land area is  
(1) 1.8% (2) 8.1%  
(3) 2.4% (4) 10%
