

**BIOLOGY****BIODIVERSITY AND ITS CONSERVATION**

21. Equadors forest is in \_\_\_ region.  
(1) Temperate  
(2) Xeric  
(3) Tropical  
(4) Semi-Temperate
22. According to scientists, in the Amazonian rain forest, there might be at least \_\_\_ insect species waiting to be discovered and named.  
(1) two million  
(2) three million  
(3) half million  
(4) ten million
23. Forest in Mid-west USA is an example of \_\_\_ region.  
(1) Temperate  
(2) Tropical  
(3) Sub-tropical  
(4) Desert
24. Amazonian rain forest is in \_\_\_\_\_.  
(1) North America  
(2) Russia  
(3) Australia  
(4) South America
25. World's largest biodiversity area is home to \_\_\_ species of plants.  
(1) 4,00,000  
(2) More than 40,000  
(3) More than 50,000  
(4) 1,00,000
26. World's largest biodiversity area is home to \_\_\_ species of invertebrates.  
(1) more than 10,00,000  
(2) more than 1,00,000  
(3) less than 1,00,000  
(4) around 427
27. World's largest biodiversity area is a home to \_\_\_ species of fishes.  
(1) 4,270  
(2) 3,000  
(3) 1,427  
(4) 1,00,000
28. World's largest biodiversity area is a home to \_\_\_ species of mammals.  
(1) 378  
(2) 427  
(3) 4,270  
(4) 1,200
29. World's largest biodiversity area is a home to \_\_\_ species of reptiles.  
(1) 1,200  
(2) 3,000  
(3) 378  
(4) 427
30. Columbia is geographically located near  
(1) South pole  
(2) North pole  
(3) Equator  
(4) Mid-west USA
