

BIOLOGY

21. Proteins contribute ___ % in plasma
[NCERT XI Pg. No. 278]
(1) 90-92 (2) 55
(3) 87-92 (4) 6-8
22. Plasma without the clotting factors is called—
[NCERT XI Pg. No. 279]
(1) Fibrinogen (2) Albumins
(3) Lymph (4) Serum
23. Most abundant cells among granulocytes of WBCs are [NCERT XI Pg. No. 279]
(1) Neutrophils (2) Basophils
(3) Eosinophils (4) Monocytes
24. Which of the following cells are involved in clotting of blood?
[NCERT XI Pg. No. 280]
(1) Monocytes
(2) Thrombocytes
(3) Platelets
(4) Both (2) and (3)
25. _____ ions play important role in clotting.
[NCERT XI Pg. No. 281]
(1) Na^+ (2) Ca^{2+}
(3) Cl^- (4) K^+
26. _____ is an important carrier of nutrients, hormones.
[NCERT XI Pg. No. 282]
(1) Lymph
(2) Lymphocytes
(3) Plasma only
(4) Serum only
27. Which of the following organism shows open type of circulatory system?
[NCERT XI Pg. No. 282]
(1) Annelids
(2) Arthropoda
(3) Chordates
(4) Both (1) and (2)
28. Type of heart present in fishes is
[NCERT XI Pg. No. 282]
(1) 3 chambered
(2) 2 chambered
(3) 4 chambered
(4) 1 chambered
29. Heart is _____ in origin.
[NCERT XI Pg. No. 283]
(1) Endodermal
(2) Ectodermal
(3) Mesodermal
(4) Both (2) and (3)
30. State true or false:
A: Ventricles are surrounded by thick wall compared to atria
B: A patch of tissue is present in the right upper corner of the right atrium called the atrio-ventricular node (AVN)
[NCERT XI Pg. No. 284]
(1) T, T (2) T, F
(3) F, T (4) F, F
