

BIOLOGY

81. Body calcium levels are under the control of
[NCERT XI Pg. No. 335]
(1) Cortisol
(2) Parathyroid hormone
(3) Thyrocalcitonin
(4) Both (2) and (3)
82. Which hormone stimulates gluconeogenesis?
[NCERT XI Pg. No. 337]
(1) Glucagon
(2) Sex corticoids
(3) Glucocorticoides
(4) All accept (2)
83. Development of axillary hair is under the control of
[NCERT XI Pg. No. 338]
(1) Androgen
(2) Aldosterone
(3) Adrenaline
(4) All except (3)
84. Hormone which controls secretion of milk also regulate?
[NCERT XI Pg. No. 334]
(1) Gluconeogenesis
(2) Contraction of uterus
(3) Production of pubic hair
(4) Development female gonads
85. Which of the following is not an endocrinal secretion?
[NCERT XI Pg. No. 339]
(1) Erythropoietin (2) Aldosteron
(3) Vassopressin (4) Oxytocin
86. Name the hormone which doesn't act on gastric glands—
[NCERT XI Pg. No. 339]
(1) Secretin
(2) Gastrin
(3) Gastric inhibitory peptide
(4) All except (1)
87. Amino acid derivative —
[NCERT XI Pg. No. 340]
(1) Cortisol
(2) Thyroid hormones
(3) Epinephrine
(4) Glucagon
88. Odd one out w.r.t secondary messenger—
[NCERT XI Pg. No. 340]
(1) IP_3 (2) Ca^{++}
(3) Na^+ (4) AMP
89. Protein hormone —
[NCERT XI Pg. No. 340]
(1) Thyroid hormone
(2) Pituitary hormone
(3) Testosterone
(4) Cortisol
90. Hormone which can get direct access into the cell membrane —
[NCERT XI Pg. No. 25]
(1) Growth hormone
(2) Adrenaline
(3) Insulin
(4) Testosterone
