

BIOLOGY

1. In human digestive system, most of the water is absorbed in ____.
[NCERT XI Pg. No. 267]
 - (1) Stomach
 - (2) Small intestine
 - (3) Large intestine
 - (4) Liver
2. Usually, the undigested food in man is ejected out in the form of –
[NCERT XI Pg. No. 267]
 - (1) Semi solid (2) Solid
 - (3) Liquid (4) Fluid
3. Undigested food is also called as
[NCERT XI Pg. No. 267]
 - (1) Chyme (2) Bolus
 - (3) Faeces (4) Parotid
4. Maltose - [NCERT XI Pg. No. 266]
 - (1) Disaccharide
 - (2) Monosaccharide
 - (3) Polysaccharide
 - (4) Polypeptide
5. Saliva contains [NCERT XI Pg. No. 266]¹
 - (1) Starch digesting enzyme
 - (2) Protein digesting enzyme
 - (3) Lipid digesting enzyme
 - (4) Nucleic acid digesting enzyme
6. Proenzyme - [NCERT XI Pg. No. 262]
 - (1) Pepsin (2) Chymotrypsin
 - (3) Pepsinogen (4) Rennin
7. pH in buccal cavity -
[NCERT XI Pg. No. 262]
 - (1) 7.8 (2) 6.8
 - (3) 5.8 (4) 0.8
8. Pepsin works optimum in -
[NCERT XI Pg. No. 262]
 - (1) Low pH (2) Acidic pH
 - (3) High pH
 - (4) Both (1) and (2)
9. Vitamin B₁₂ is absorbed with the help of
[NCERT XI Pg. No. 262]
 - (1) Extrinsic factor
 - (2) Intrinsic factor
 - (3) Chief cells
 - (4) Concentrated HCl
10. The stomach stores the food for
[NCERT XI Pg. No. 262]
 - (1) 8-10 hours (2) 7-8 hours
 - (3) 2-4 hours (4) 4-5 hours
