

BIOLOGY

31. The feedback mechanism is related with:
- (1) Bile secretion
 - (2) Hormonal secretion
 - (3) HCl secretion
 - (4) Mucous secretion
32. Renin is produced by:
- (1) Liver
 - (2) Spleen
 - (3) Juxtaglomerular cells
 - (4) Stomach
33. Hormone produced in allergic reactions is:
- (1) Glucocorticoid
 - (2) Mineralocorticoid
 - (3) Norepinephrine
 - (4) Epinephrine
34. Triple 'F' gland for flight, fright and fight is:
- (1) Thyroid
 - (2) Thymus
 - (3) Pituitary
 - (4) Adrenal
35. Under secretion of adrenal cortex causes:
- (1) Sterility
 - (2) Addison's disease
 - (3) Cretinism
 - (4) Dwarfism
36. On the basis of chemical nature, mark the odd one out.
- (1) Insulin
 - (2) Parathormone
 - (3) Thyroxine
 - (4) Growth hormone
37. Hormone whose secretion increases in emotional disturbances or stress is:
- (1) Vasopressin
 - (2) Adrenalin
 - (3) Thyroxine
 - (4) Oxytocin
38. Which amino acid helpful in synthesis of epinephrine hormone?
- (1) Valine
 - (2) Proline
 - (3) Tyrosine
 - (4) Alanine
39. Glucagon is secreted by:
- (1) β cells of islets of Langerhans
 - (2) α cells of islets of Langerhans
 - (3) β cells of pancreas
 - (4) Adrenal cortex
40. Which of the following diseases is caused by the hyper secretion of cortisol?
- (1) Anaemia
 - (2) Addison's disease
 - (3) Hyperglycemia
 - (4) Cushing syndrome
